SKILLS & INTERESTS

- **Languages** : Python, JavaScript, Kotlin, Java, Bash, Golang, Rust
- **Frameworks** : SpringBoot, Express.js, Flask, FastAPI, Quart, Uvicorn, React
- **Databases** : MongoDB, CouchDB, PostgreSQL, MySQL, Redis, DynamoDB
- **Tools** : Git, Splunk, pytest, Selenium, Mocha, Jest
- **Infrastructure** : Kubernetes, AWS, Azure AKS, ArgoCD, Travis CI, Jenkins

WORK EXPERIENCE

Atlassian

Dec. 2022 – May 2025

Backend Developer

Bangalore, IN

- Development
 - Worked on Anti-Abuse/Spam, suspicious user detection by signal generation, used **OPA** policies to achieve the same in using **Golang** and **Rego**. Protecting **millions of customers** in the process.
 - Worked on Gibberish Detection Algorithms to detect spammy sites and bad actors.
 - Developed a new service in **Kotlin, Spring Boot**, responsible for milestones including adding business logic, integrations with other teams and ensuring uptime.
 - Developed pipeline failure detection systems using **Splunk APIs** to extract log data and notify respective teams of failures, significantly reducing customer impact.
- Responsibilities
 - **Technical Feature Lead** for the BETA launch of data residency for marketplace apps, including engineering and testing plans.
 - **Mentored** interns and provided guidance helping them navigate complex technical challenges and foster their professional growth.

Klinify

Dec. 2020 – Dec. 2022

Senior Backend Engineer, Backend Developer

Singapore

- Responsibilities
 - Created new services from scratch that aid business growth. (**Python Microservices**)
 - Spearheaded the management of **Kubernetes** clusters in multiple Availability Zones and oversaw the internal services to guarantee consistent uptime and reliability. (**Azure AKS**)
 - Organizing integrations with third party services and operationalizing projects by implementing internal tools.
 - Scaling the infrastructure with the customer growth.
- Development
 - Refactored APIs to be asynchronous, resulting in a **50%** reduction in resource costs while scaling to handle **10K requests per second**. (**Flask to Uvicorn**)
 - Leveraged open source code to implement a terminology service (FHIR) in **Java, Spring Boot**
 - reduction in project timeline by **80%**.
 - **90%** cost reduction by moving away from a service vendor.
 - Developed an unsubscribe mechanism and campaigning service in **TypeScript**.
 - Setup caching mechanisms using **Redis**, reducing the load time by **90%** for heavier endpoints.
 - Major codebase refactor (**200K LOC**) to make APIs compliant with **OpenAPI** spec using **connexion**. Additional unit testing with **pytest**.

Rodo

Full Stack Developer, Infrastructure Engineer

Jan. 2020 – Dec. 2020

Bangalore, IN

- Development
 - Created a Dynamic Excel Generation Mechanism for bulk upload operations.
 - Programmatic VBA injection, Excel-JSON (de)serialization.
 - On boarded high value customers with the feature.
 - Implemented a Custom Analytics Dashboard that calculated business metrics for users in real time.
 - Leveraging open source, slashed map library costs by **90%** by migrating from **Google Maps** to **Leaflet**.
- Infrastructure
 - Migrated the infrastructure to containerized microservices using **Kubernetes** with **kOps**.
 - Containerizing reverse geocoding services (**OSRM, Nominatim**).

Freelancing

- Implemented a Data Scraping Pipeline capable of processing over 2 million records for research purposes. Developed using **Selenium, TinyDB, Electron**.

EDUCATION

A.D. Patel Institute of Technology

Computer Engineering

Sept. 2016 – Oct. 2020

Anand, GJ

- CGPA : 8.43
- Co-developed the official social platform for our college, using **React Native and GoLang**.
- Hypothesized a Logical Error Detection System based on GPU K-Nearest Neighbors.

ACHIEVEMENTS

- Winner of Smart Gujarat Hackathon 2018, a government funded hackathon that involves solving issues faced by the state government's departments. Developed an Attendance System using **Facial Recognition** that required minimal cost.
- Ranked under **Top 40 teams all India** in TCS Enginix, a team based engineering contest that rewards innovative impactful solutions to real life problems.
